

Gays and Pedophilia

Perhaps one of the most vicious of all the lies about homosexuals is the one attempting to characterize them as pedophiles.

Here are some findings from the scientific peer-reviewed journal, "[Pediatrics](#)" published in July of 1994. The study was done by Dr. Carole Jenny of the University of Colorado Health Sciences Center. The subjects were 269 sexually abused children seen at Denver Children's Hospital over the course of one year.

*1 in 219 girls was molested by a lesbian * 1 out of 50 boys by a gay male.* About 8 in 10 girls were molested by a man who was or had been in a heterosexual relationship with the child's mother or another relative. *3 out of 4 boys were abused by males in heterosexual relationships with female relatives.

2% of the boys in the study were molested by gay males.

98% of the boys in the study were molested by heterosexuals. Of that number, 75% were molested by heterosexual males KNOWN TO THE VICTIMS in an incestuous scenario.

0.05% of the girls in the study were molested by a lesbian.

99.5% of the girls in the study were molested by heterosexuals. Out of that number, 80% were molested by heterosexuals KNOWN TO THE VICTIMS in an incestuous scenario.

Other studies report parallel numbers.

Groth, A. Nicholas, and H. Jean Birnbaum, 1978 "Adult Sexual Orientation and Attraction to Underage Persons", Archives of Sexual Behavior, 7, 175.

"Suggests that homosexuality and homosexual pedophilia may be mutually exclusive and that the adult heterosexual male constitutes a greater risk to the underage child than does the adult homosexual male." [p 609]

Newton, David E., 1978 "Homosexual Behavior and Child Molestation: A Review of the Evidence", Adolescence, 13, 29.

"Existing studies provide no reason to believe that anything other than a random connection exists between homosexual behavior and child molestation. The typical offender is a heterosexual male." [p 610]

"Stigma, Prejudice, and Violence Against Lesbians and Gay Men" (pp. 60-80 in John Gonsiorek and James Weinrich (eds) "Homosexuality: Research Implications for Public Policy" Sage Publications, 1992). Herek says: "Since 1978, no credible new data have been published that contradict the conclusions" [that pedophilia is a crime committed almost exclusively by heterosexuals].
